

# How to Delete Your Diesel Truck with the Calibration King

Thank you for choosing the Calibration King! This guide explains how to use our standalone tuning device to reprogram your diesel truck's Powertrain Control Module (PCM) for enhanced performance by removing emissions control systems (commonly referred to as "deleting").

## Important Notes

- **Warranty Warning:** Deleting your truck may void your vehicle's warranty. Consult your manufacturer's warranty terms.
- **Backup Your Data:** Before using the Calibration King, back up your truck's stock PCM settings to restore them if needed.

## What You'll Need

- Calibration King tuning device
- A compatible OBD-II cable is attached to the Calibration King

## Step-by-Step Guide

### Connect to the Truck's PCM:

- Locate your truck's OBD-II port (typically under the dashboard near the driver's seat).
- Plug the Calibration King's OBD-II cable into the port securely.

### Back Up Stock PCM Settings:

- Select **Backup/Restore**
- The unit will say 'Store Original CAL.' press the 'Yes' button.
- The Calibration King automatically stores your PCM's configuration and pairs itself to your truck with the VIN number.

### Select the Delete Tune:

- Go back to **Backup/Restore**.

- Next, you are ready to either restore or select your delete tune. The menu will allow you to **Restore Original**; this option allows you to restore the PCM's configuration that you backed up.
- On the SD card slots, there are two delete tunes: one for **Tow** and the other for **Performance**. The other two slots should be blank.
- Select your Tune and hit the "Yes" button. The Calibration King will now program your PCM with the tune you selected. This should take about 15 to 20 minutes.

## Post-Delete Maintenance

- **Update Tunes:** Regularly check **calibrationking.info** for Calibration King tune updates. Download updates to your SD card to maintain compatibility.
- **Reinstall for Compliance:** If you need to restore emissions systems (e.g., for inspections), use the Calibration King to restore your original settings with the **Backup/Restore** feature.
