  PIDs/Data Log
  Serial Number
```

When first connected to a new vehicle, you must do a backup of the vehicle's original CAL before using the backup and restore feature.

Once this is done, the product will be locked to that vehicle until you restore the original CAL.

## Backup/Restore

```
Backup
0 Restore
  Restore Original
  Update Original
```

4-Slots  
Unlock

## MENU:

  Serial Number
```

## PIDs/Data Log

[PID] [PID TITLE]

[Description]

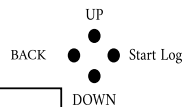

PID X of Total PIDs

## PID View:

[Title]

[Value] [Units]

Data is streamed real time from vehicle.

When data logging a standard CSV a file is created under DATALOG folder on the MicroSDcard.

This file can be open directly with any spread sheet program like Excel.

This product will work on all vehicles that are OBD-II compliant. The backup and restore is only supported on the listed vehicles.

MAPLE LEAF
